TOGAF Development framework

Development Framework

US FEA Framework’s Collaborative Planning Methodology

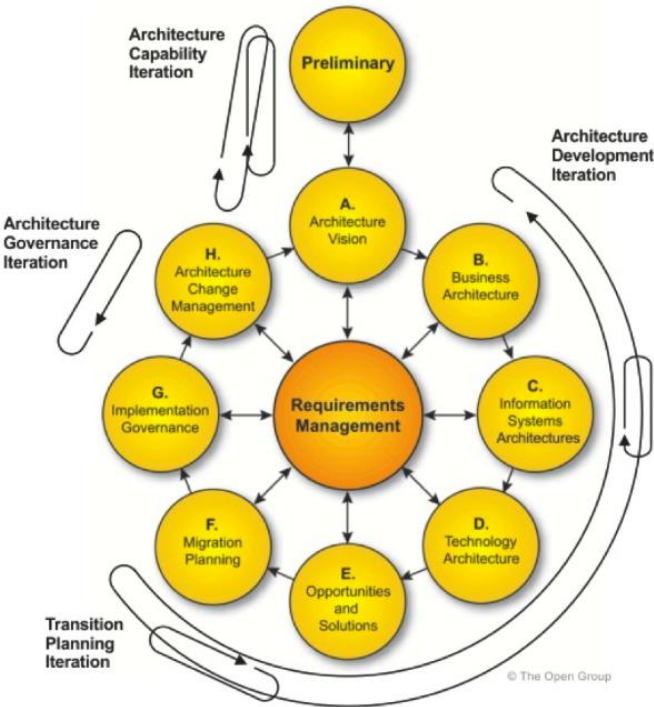

Swiss’s Project Management Approach

KU’s Project Management Approach for TGEA

TOGAF’s ADM (Architecture Development Model)

Key Output of Planning Step

- 1) **identified and validated needs;**
- 2) an overarching **set of performance metrics;** and
- 3) a determination of **who (governance) will ultimately oversee and approve recommended changes to meet those needs.**

leadership/stakeholders will **possess an integrated set of plans and artifacts** defining what will be done, when it will be done, what benefits will be achieved and when, and an estimate of cost.

recommendations for addressing the defined needs have been **implemented.**

Governance have determined **whether or not they can leverage** the experiences/results of other organizations for their own needs.

key outcome of this step is **measured performance outcomes** against identified metrics.

e-FORM driven PROCESS

What to be processed:

1. Submitting entity verification
2. PKI Time stamping
(on data submitted)
PKI Safe (on hash file)
3. Service requesting system

Business Processes

electronically Handling for

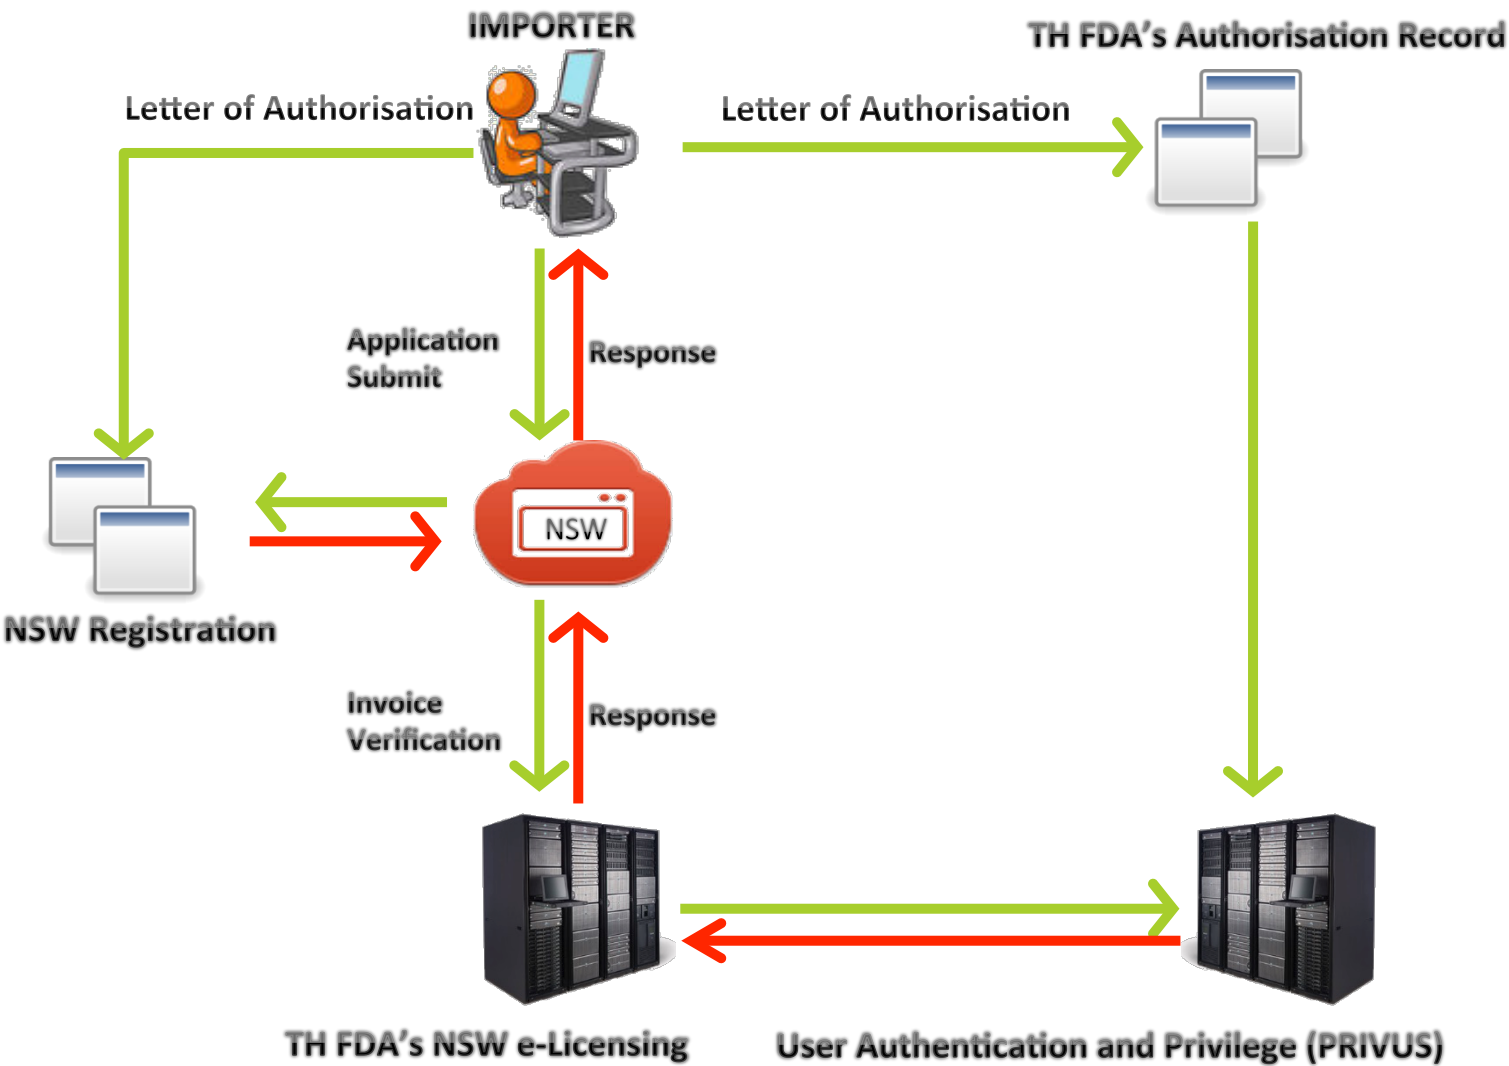

1. Core Processes

Pre-Marketing/Post Marketing Activities

2. Support Administrative Processes

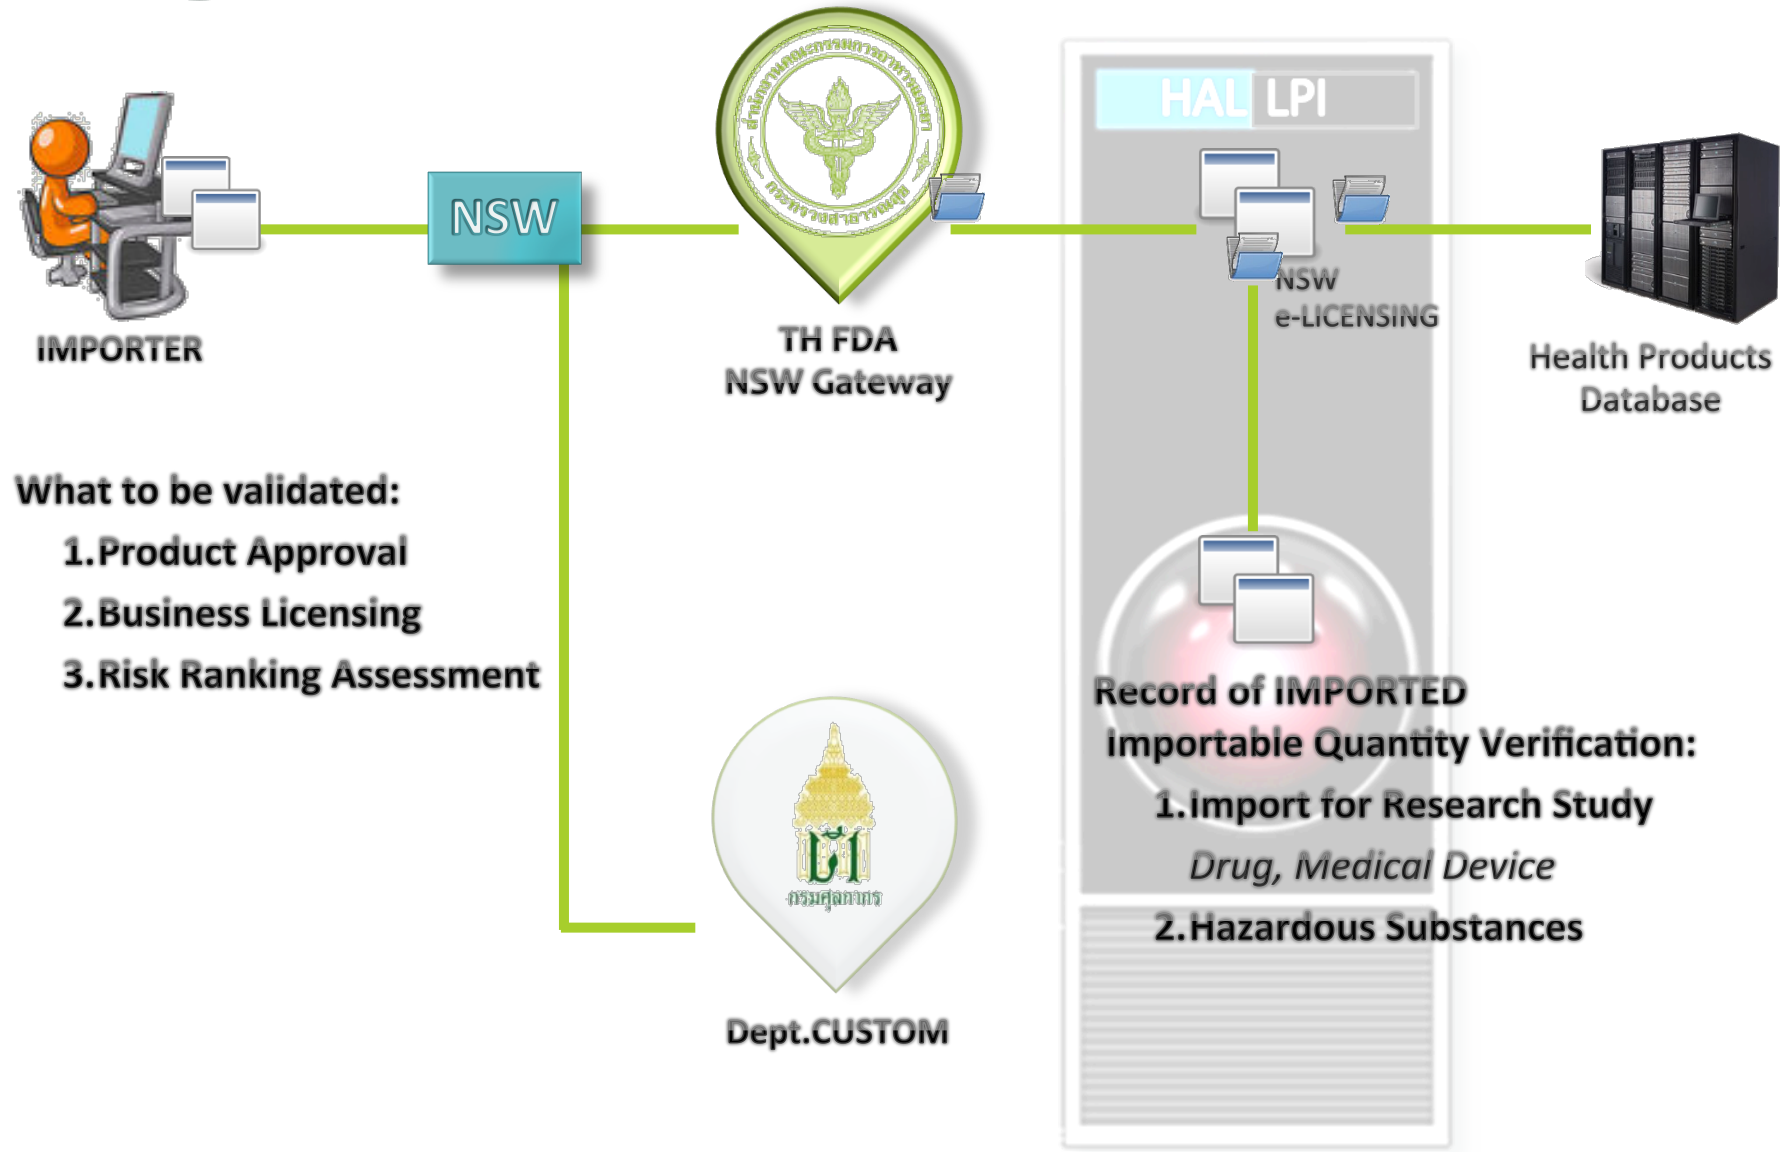

Registration for NSW

How HAL.LPI work

- What to be validated:
- 1.Product Approval
 - 2.Business Licensing
 - 3.Risk Ranking Assessment
