Digitisation of the Public Sector in Denmark

April 2019

The Ministry of Finance

The Danish Context

- Population of Denmark: 5.6 million.
- Public sector involved in most life events.
- Very high degree of trust in public sector.
- High degree of Internet penetration, usage and competencies in population:
 - 97 pct. aged 16-74 have Internet access at home.
100 pct. businesses have Internet access (10 or more employees; without financial sector).
 - 92 pct. aged 16-74 use Internet every day.
 - 92 pct. aged 16-74 have interacted online with public authorities within the past 12 months.

Source: Eurostat, 2017-2018 data. European Commission.

Levels of Government in Denmark

- Central government.
- 5 regions:
 - Health services (e.g. hospitals).
 - Cannot levy tax.
- 98 municipalities:
 - Citizens-oriented services.
 - Can levy tax.
 - Municipal autonomy.
- Welfare services are delivered by regions and municipalities.

Source: Eurostat, 2017 data. European Commission.

Municipalities and
Regions in
Denmark
1 January 2007

The Potential for Cost-savings

Channel	Cost per transaction (EUR)
Personal services	14,0
Received letters (paper)	11.7
E-mails	11.0
Telephone calls	7.8
e-services/self-services	4.2

More than 15 Years of Collaboration within the Public Sector

2001

Digital Collaboration

- Digital signature.
- Citizens are allowed to send e-mails to authorities.
- Authorities are communicating digitally.

2004

Efficient Payments and Internal Digitisation

- “Easy account” and eInvoicing.
- *virksomhed.dk* and *sundhed.dk*.
- Secure e-mail between authorities.

2007

Common Infrastructure

- “EasyID”, “EasyLogin”, eIncome.
- Digital Post, “EasySMS”, *borger.dk*.
- Authorities are obliged to use the common ICT infrastructure.

2011

Digital Communication

- Mandatory Digital Post for citizens and businesses.
- Mandatory online self-service for citizens and businesses.
- Digital welfare solutions.
- Basic Data Programme.

2016

Safer Digital Transformation

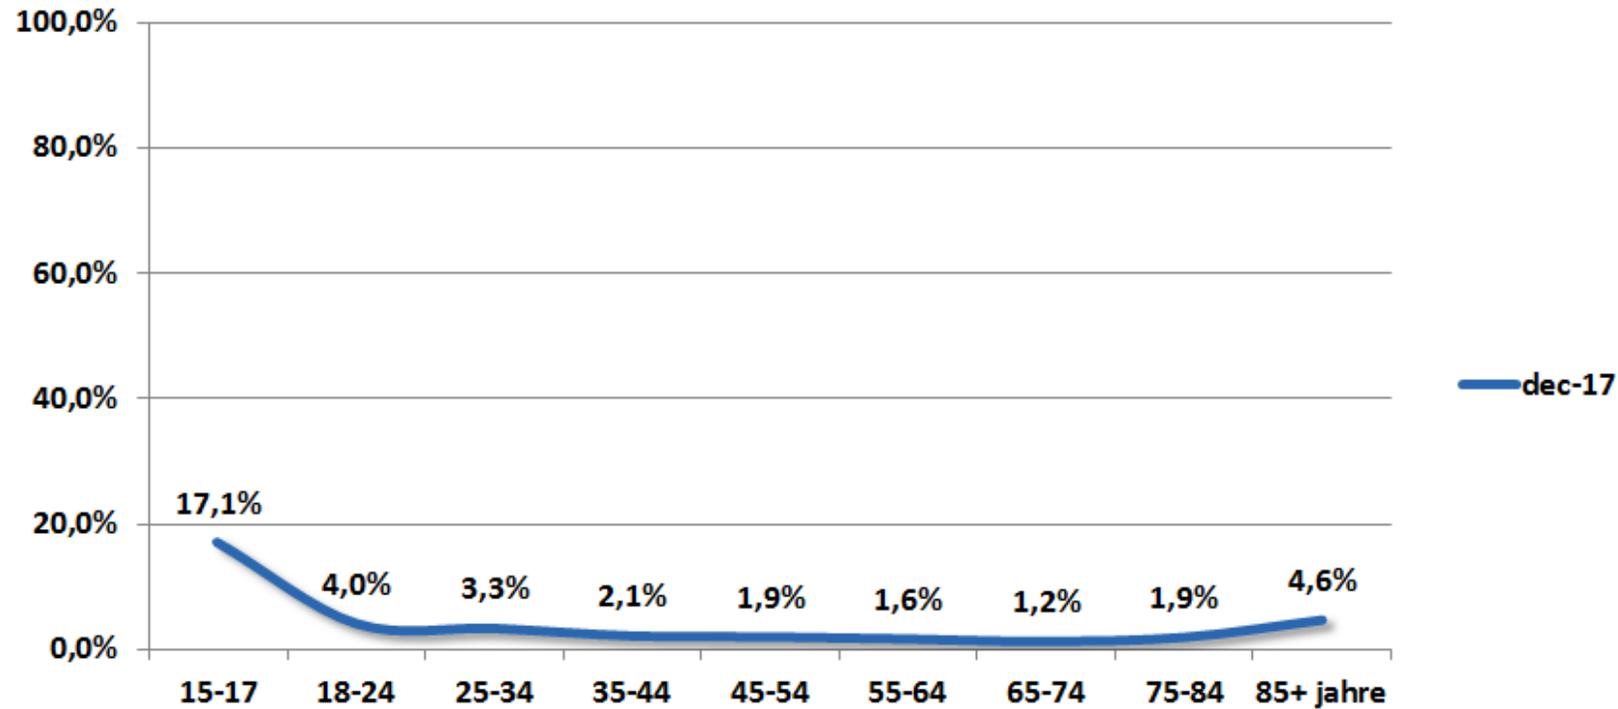

- User-friendliness and coherency of services.
- Data for efficiency, quality, and economic growth.
- Strengthened information security strategy.
- ICT architecture framework for interoperability
- ICT management strategy

The Case of *Digital Post*

- 4,8 million citizens of 15 years of age and above are provided with a mandatory digital letter box – Digital Post:
 - July 2018:
 - 4.395.889 (91 pct.) citizens are registered for Digital Post.
 - 434.566 (9 pct.) citizens have an exemption from the use of Digital Post.
- 84 pct. of the users are satisfied with Digital Post.
- The public authorities are sending large number of digital letters:
 - 88.9 Million messages in 2015
 - 112.6 Million messages in 2016
 - 126.0 Million messages in 2017
 - 141.3 Million messages in 2018

Digital Post – how many do not read their mail

Registered citizens by December 2017 who have received digital letters within the last six months without logging on to their Digital Post account; age distribution.

borger.dk – the Danish Citizen Portal

- **Monthly visits:** 3 million.
- **User-satisfaction:** 93 pct. are satisfied (December 2018)
- **Personalised user-experience:** more sharing of relevant personal data.

What do Users think of *borger.dk*?

Citizens know about borger.dk

94% (under 70 years) know about borger.dk

Citizens are satisfied and feel confident when using borger.dk

92% are satisfied or very satisfied with borger.dk

93% of the users (who know about borger.dk) feel confident using borger.dk

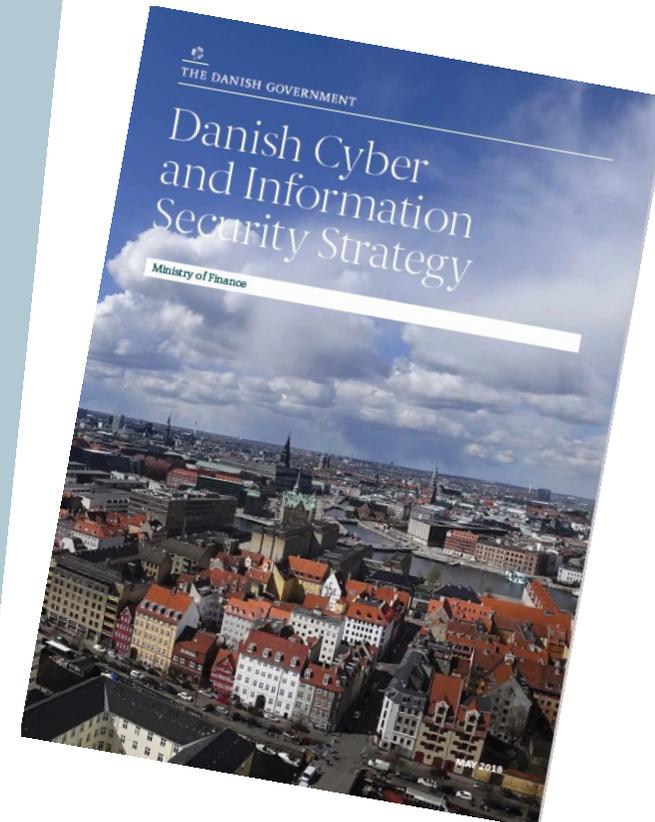

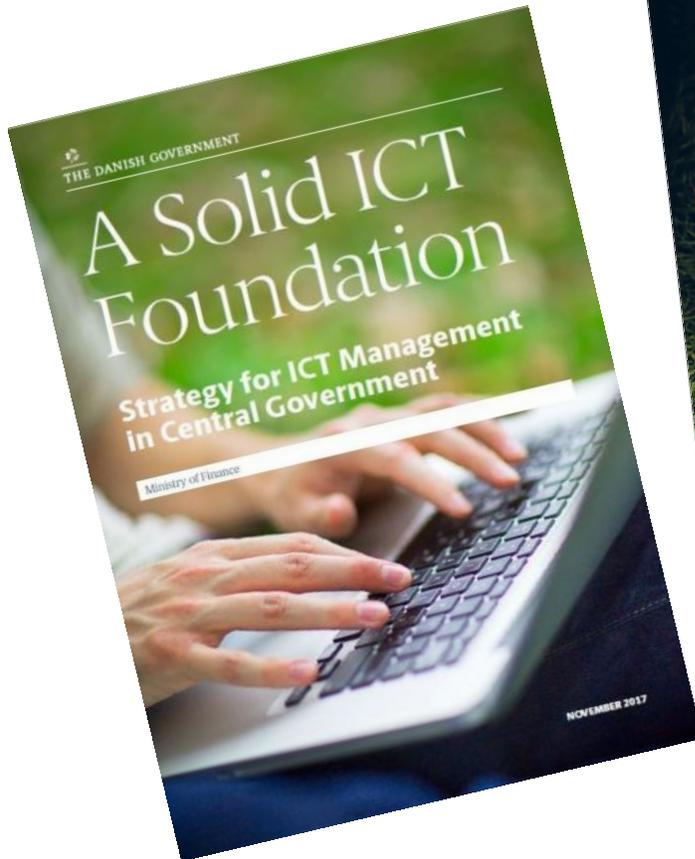

87% find it easy to find what they are looking for on borger.dk

Citizens value the content

91% find the content easy to read and to comprehend

87% find that the quality of the content is high

Four Major Initiatives Launched in 2017/2018

World-Class Digital Services (2018)

- Knowledge, overview, transparency:
 - Strategy for re-use of data in the public sector.
 - Creation of a Data Ethical Council.
 - Access to own information and status on ongoing cases with public authorities.
- Digital services for citizens and businesses:
 - Coherent digital user-journeys.
 - Harmonised digital communication.
- Technology and new welfare solutions benefiting more people:
 - Investment fund for new technologies and digital welfare solutions.
 - Denmark as a front-runner in AI usage.

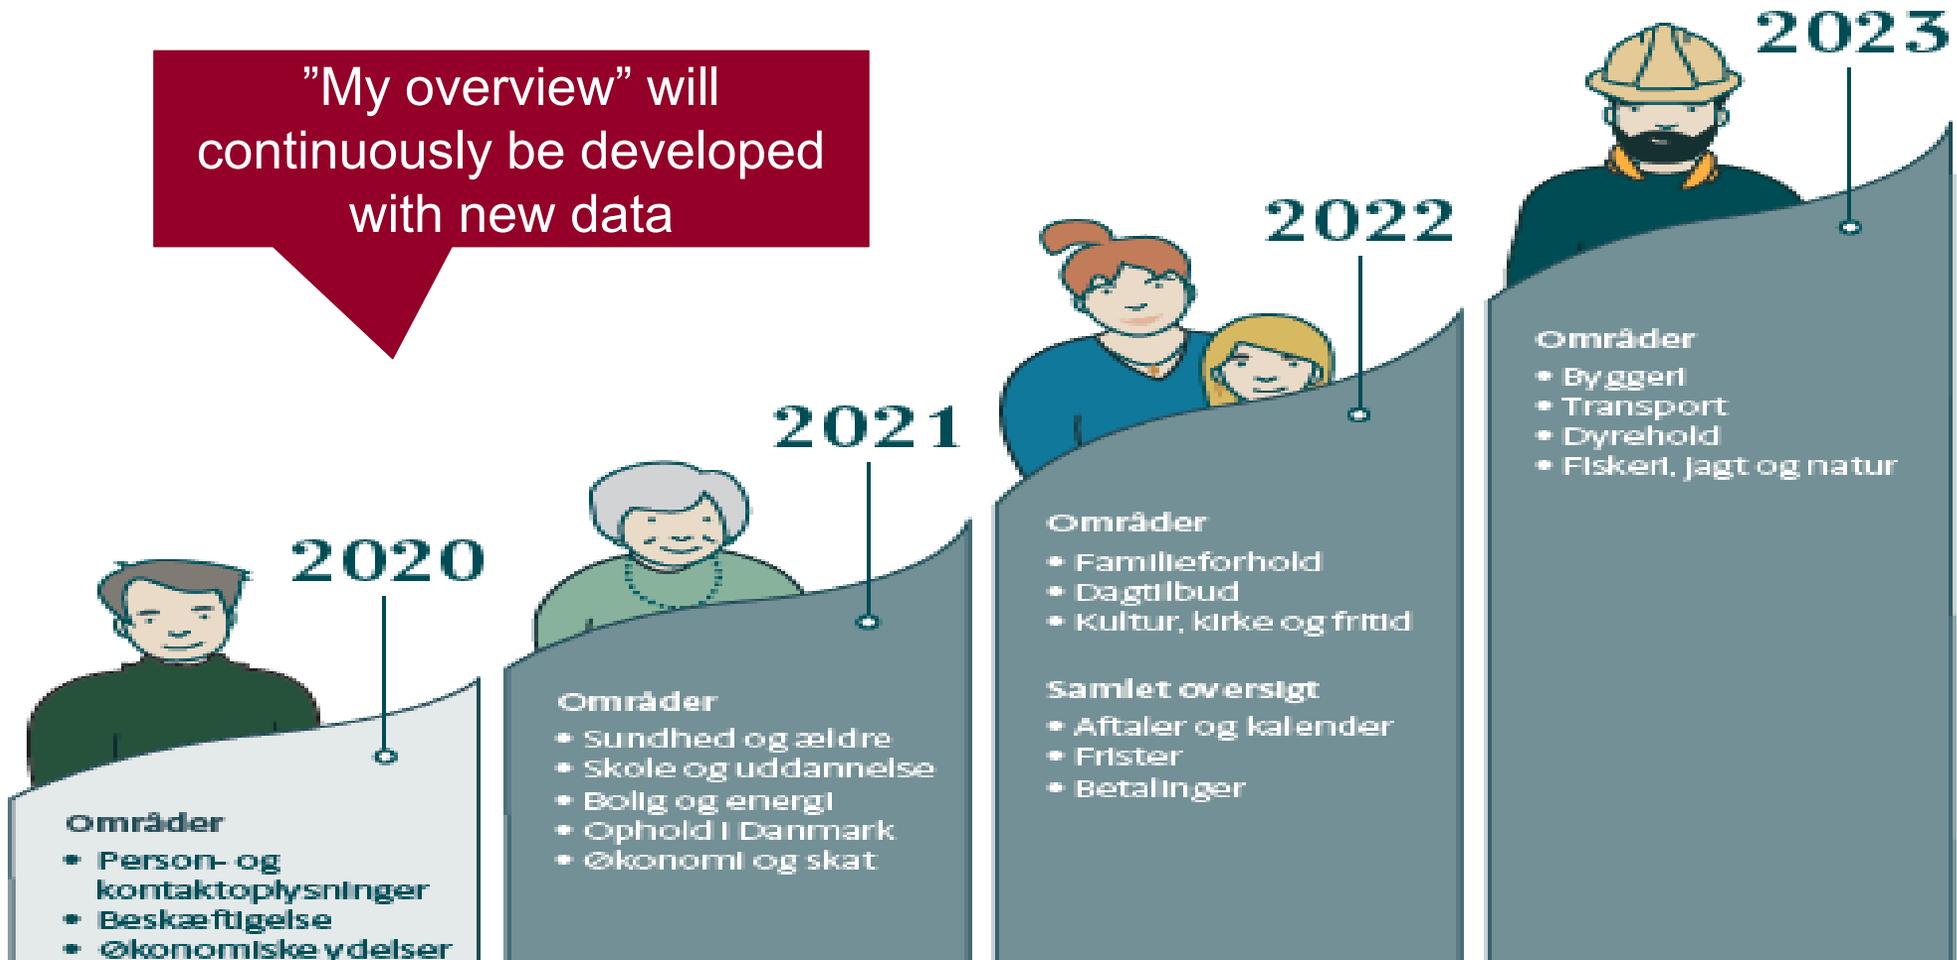

”My overview” must strengthen trust...

- Citizens get a better overview of
 - Cases
 - Benefits
 - Appointments
 - Data about oneself
 - Deadlines and payments
- Analysis of a possible log-function where citizens can see, who have accessed data about them

... but will not be ready in one day

Coherent digital user-journeys

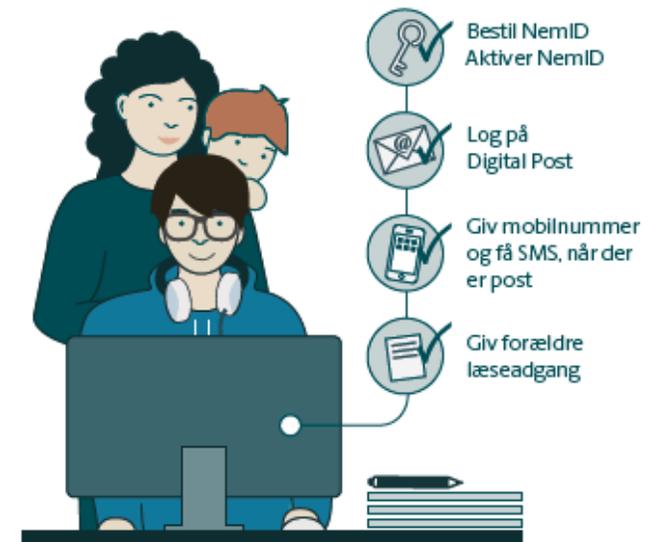

- Coherent digital user-journeys
- 10 user-journeys for citizens
- 10 user-journeys for companies

For citizens e.g.

- Become a digital citizen (15 year olds)
- Become a parent

For companies e.g.

- From small to medium-large company
- Hiring your first employee

AI Strategy

- Sets the frame for the public and private sector
 - Ethical principles for AI
 - Open and better data
 - Competencies and knowledge
 - More investments
 - International cooperation

Thank you

AGENCY FOR DIGITISATION
MINISTRY OF FINANCE

Data sharing and open government data

May 2019

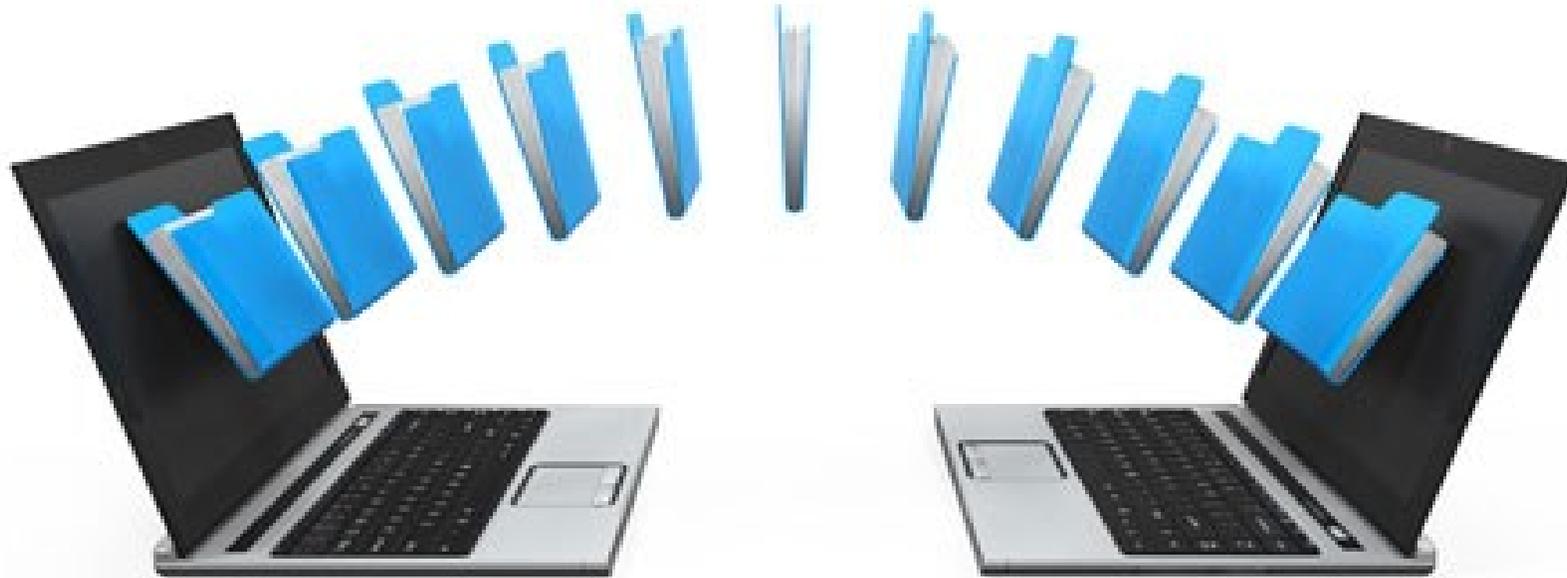

Topics

1. Data sharing
 - The digitally coherent public sector

2. Open government data
 - The Basic Data Programme
 - Re-use of public sector information (PSI)
 - National data set catalogue

1. Data sharing

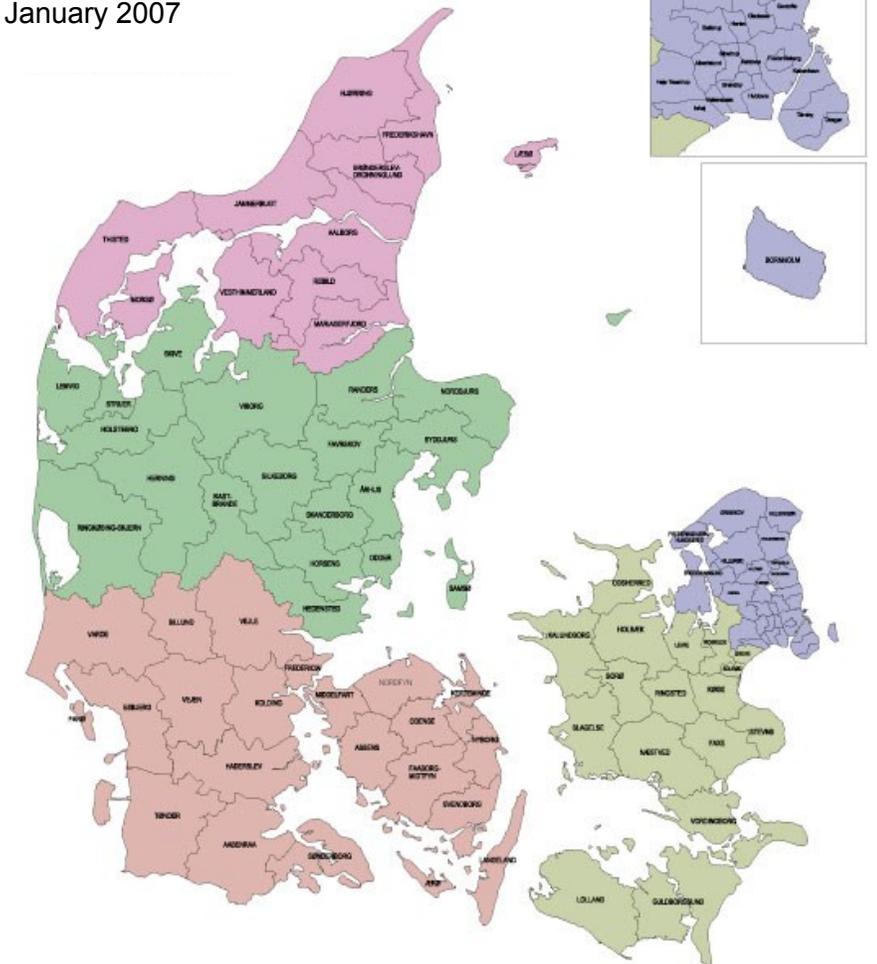

Levels of Government in Denmark

- Central government.
- 5 regions:
 - Health services (e.g. hospitals).
 - Cannot levy tax.
- 98 municipalities:
 - Citizens-oriented services.
 - Can levy tax.
 - Municipal autonomy.
- Welfare services are delivered by regions and municipalities.

Source: Eurostat, 2017 data. European Commission.

Municipalities and
Regions in
Denmark
1 January 2007

Sharing and reusing data

- Common public architecture enables the ability to share data across the public sector to benefit citizens and companies
- Citizens and companies should if possible only have to hand-in the same information one time to the public sector (once-only principle)
- The efforts must be developed in compliance with data protection laws (GDPR)
- Architecture and legislation are mutually dependent. Legislation needs to be ready for digitisation and architecture need to support legislation (enables automation)

The vision of coherence

The vision: A digitally coherent public sector

The common architecture of digitisation facilitates an effective and secure sharing of data and digital transversal processes between public authorities and supports the public sector in delivering good, effective, consistent, correct and transparent services and regulation to citizens and businesses.

Common public sector digital architecture

- Architecture for safe and effective data sharing
- Common public rules on modelling data
- Common language for data quality

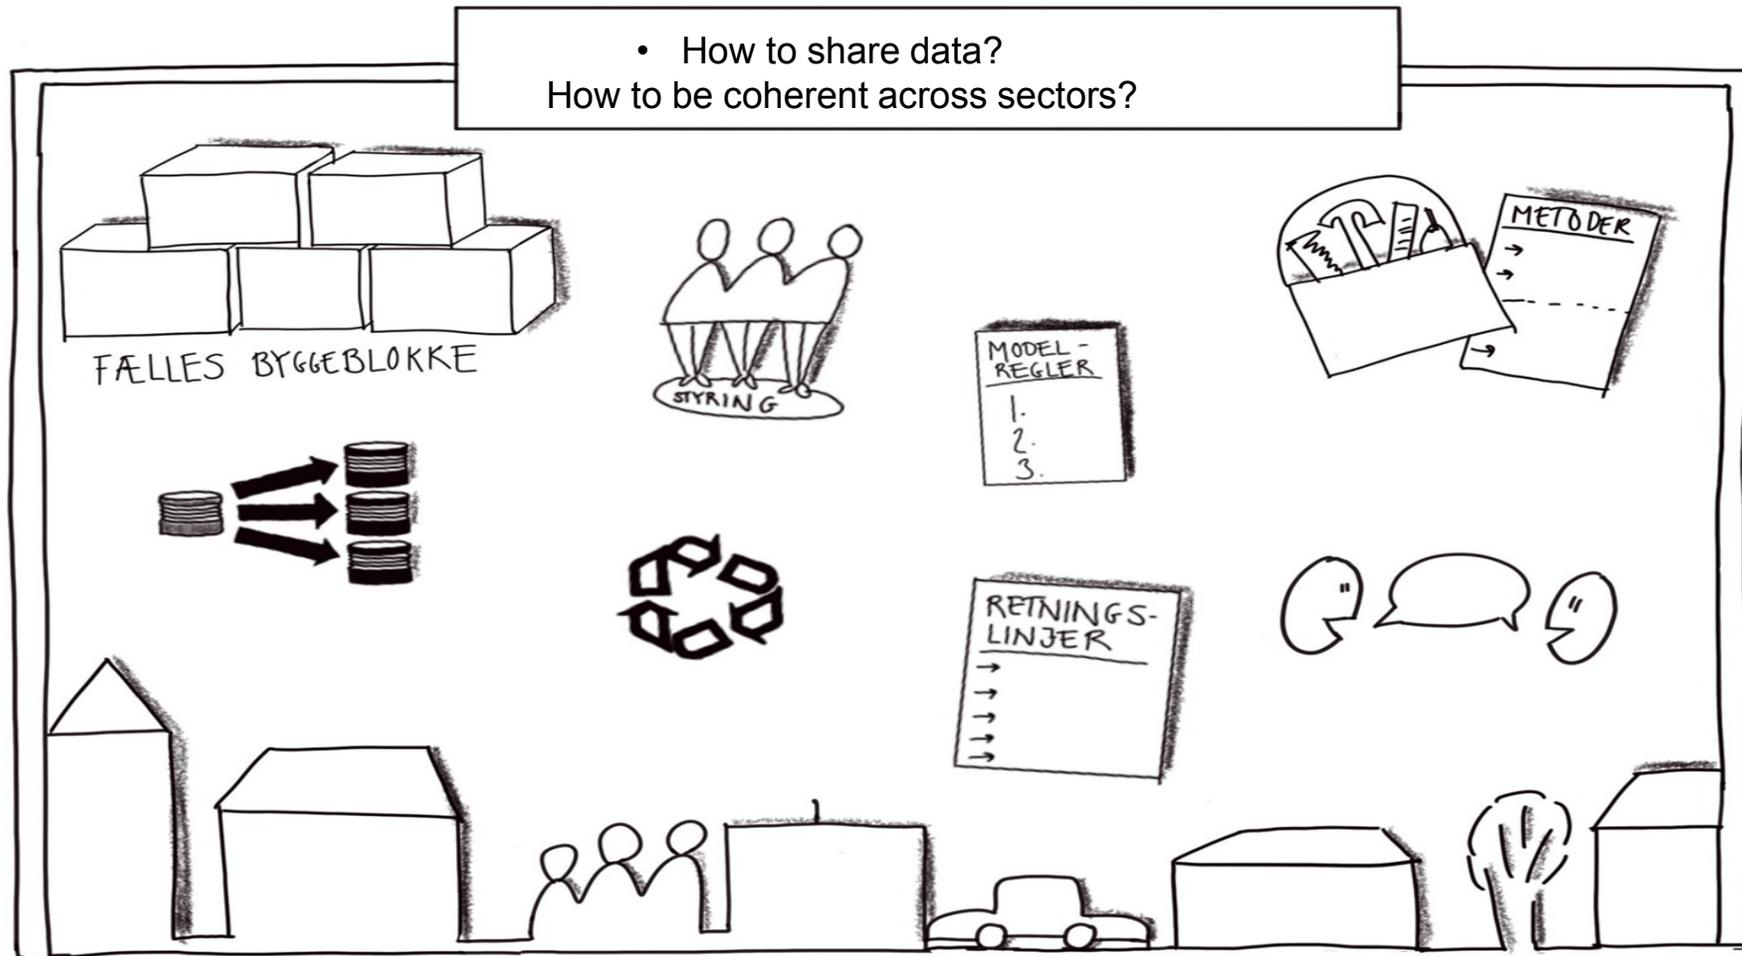

The digitally coherent public sector

White Paper on a common public-sector digital architecture

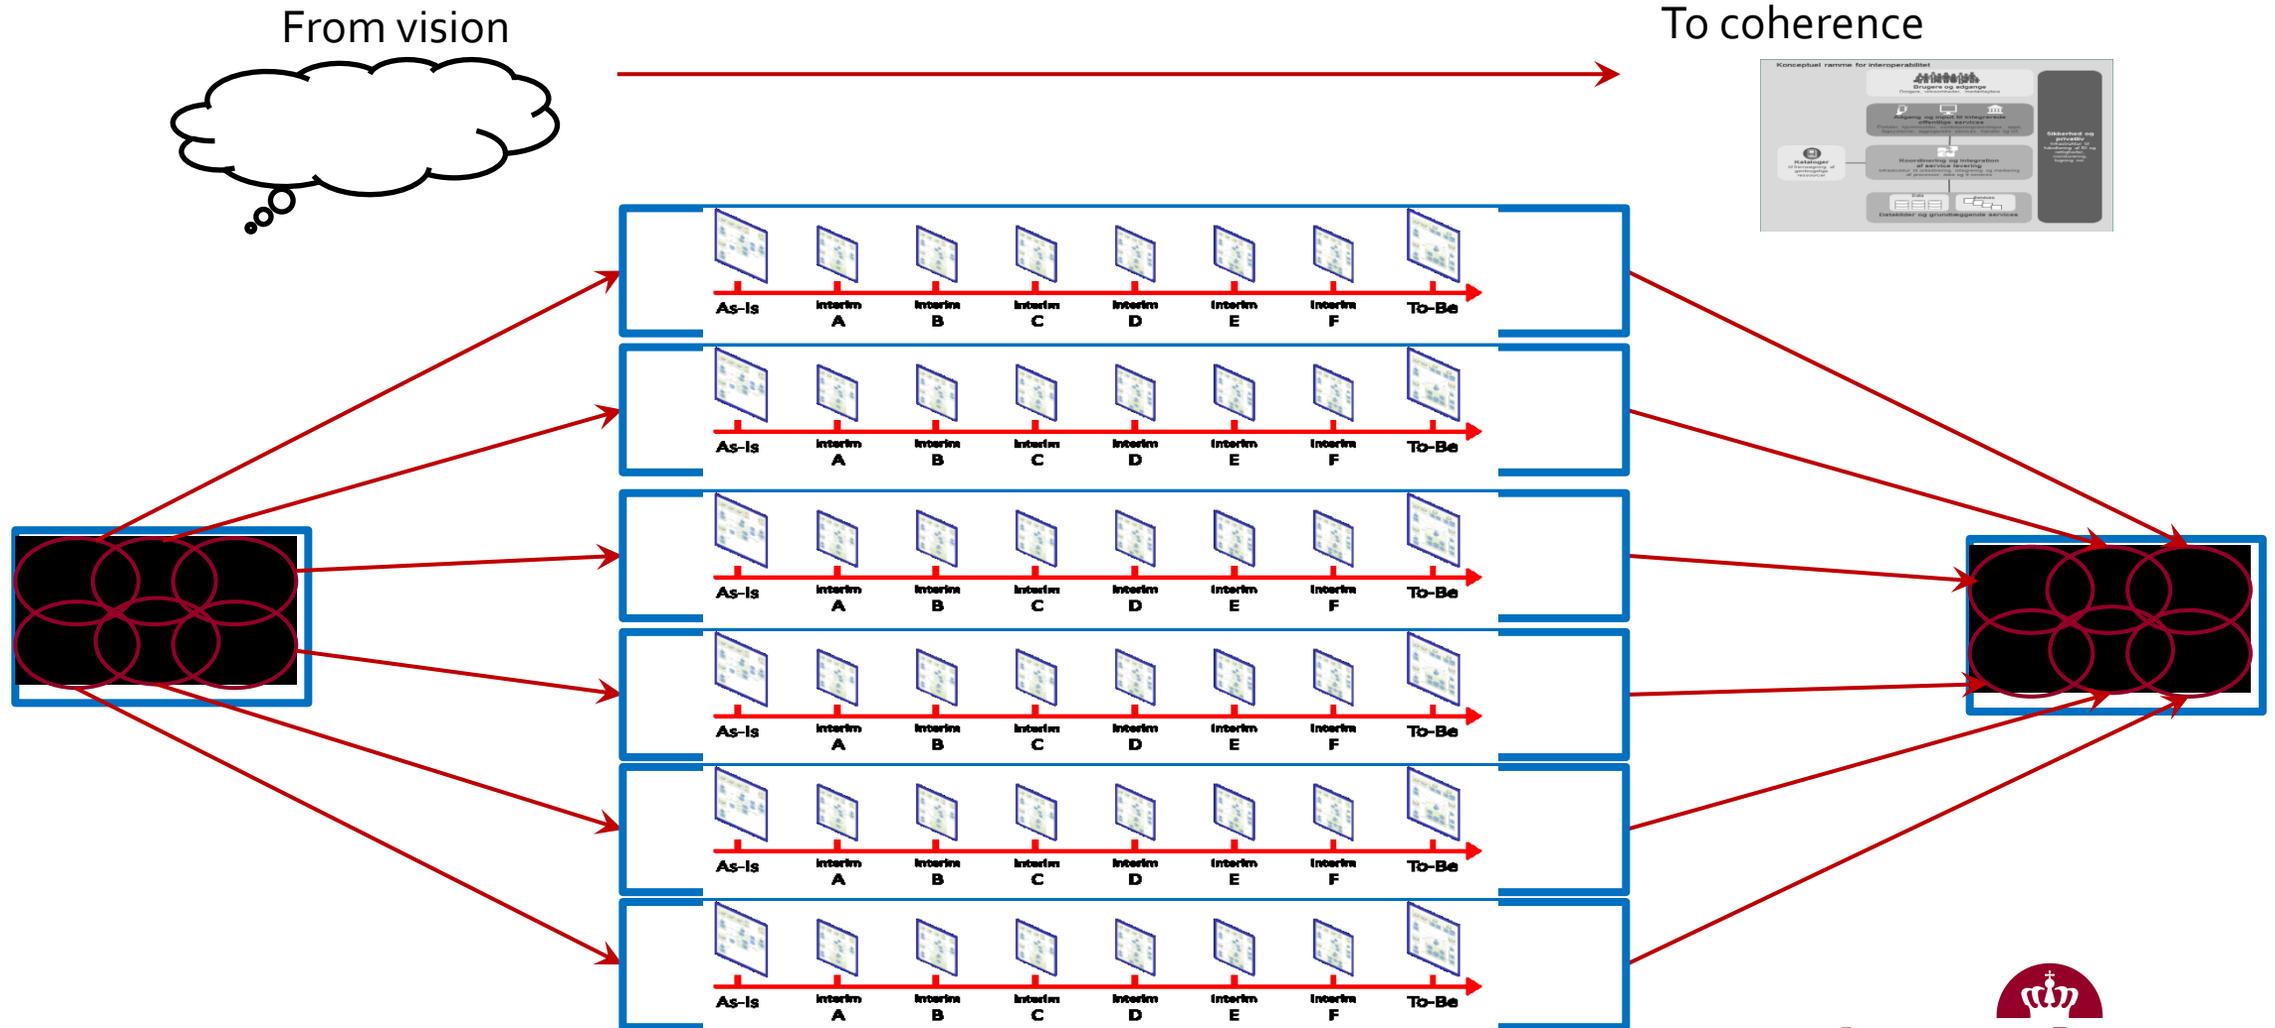

Version 1.0, June 2017

2017

How do we do it?

Development over time

2. Open Government Data

- Many initiatives:
 - Open Data DK (municipalities)
 - digitaliser.dk (free platform)
 - Open Data Innovation Strategy (ODIS) – Initiative from 2009
 - Open Government Partnership (OGP) – International collaboration
 - Basic Data Programme
 - Implementation of the PSI directive
 - National data set catalogue
 - ... and more to come

The Basic Data Programme

Basic data - the data we use repeatedly in the public sector

- Basic and coherent data on properties, addresses, persons, companies and geography – the raw material of Denmark.
- Basic data is used and shared across the public and private sector in Denmark

The Basic Data Programme: A cross-government effort

- **Open access** to public-sector basic data for everyone, including enterprises and individuals.
- Data is **standardized** so that it can be combined and applied coherently
- The **quality** of basic data is significantly increased
- Basic data is **made easily available** through a common single distribution solution the Data Distributor

Current status of the Basic Data Programme

REAL PROPERTY

**ADDRESSES, STREETS
AND AREAS**

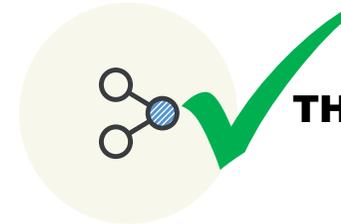

**MAPS AND
GEOGRAPHY**

COMPANIES

WATER AND CLIMATE

THE DATAMODEL

PERSONS

THE DATA DISTRIBUTOR

The business case

- Benefits for public authorities: Efficiency gains amounting to 30M Euro annually in municipalities, regions and central government
- Benefits for private authorities: Growth and innovation potential - At least 65M euro annually in the private sector

Benefits and improvements with basic data

Security

Increased
data quality

Once only

Revision of the current PSI-directive

- Data sets of high value:
 1. Geospatial
 2. Environment
 3. Meteorological
 4. Companies and ownership
 5. Statistics
 6. Mobility
- Policy for research data
- Public service companies within specific sectors
- Unified across the EU
- Implementation at the latest in 2021

The national data set catalogue

- Built so public authorities can display and access adequate and necessary information (metadata) regarding the data set in a uniform way
- Provides links to how to access and in what formats
- Data sets are listed in themes in compliance with the European data portal
- No personal data and GDPR compliant
- The solution is easily adjustable and can be developed and expanded over time

The screenshot shows the homepage of the National Data Set Catalogue. At the top right, there is a "Log ind" link. The main header features the logo of the Agency for Digitisation (a crown) and the text "DIGITALISERINGSSTYRELSEN". Below the logo are navigation tabs: "Datasæt", "Organisationer", "Temaer", "Om", "Vejledning", and "Historiske datasæt". A prominent red search bar is labeled "Søg datasæt" and contains the placeholder text "F.eks. Miljø" and a search icon. Below the search bar, there are two summary boxes. The first, "Hele Danmarks metadata", states that the catalogue provides an overview of public datasets and their metadata. The second, "Overblik", shows statistics: 14 Datasæt, 4 Organisationer, and 14 Temaer. The main content area is a grid of theme cards, each with an icon, a title, a code, and a count of datasets. The themes are: "Befolkning og samfund [SOCI] 2 datasæt", "Energi [ENER] 0 datasæt", "Internationale spørgsmål [INTR] 1 datasæt", "Landbrug, fiskeri, skovbrug og fødevarer [AGRI] 0 datasæt", "Ukategoriserede datasæt" (with a note that this theme is reserved for datasets without a category), "Miljø [ENVI] 0 datasæt", "Økonomi og finanser [ECON] 11 datasæt", and "Regeringen og den offentlige sektor [GOVI]".

Agenda

- The Danish Digital Landscape
 - Components and prerequisites
- The public-sector citizen portal – borger.dk
 - Setup, objectives and content
- Facts and figures
 - Statistics and user feedback
- The (near) future
 - How to create an more coherent digital service

The Danish Digital Landscape

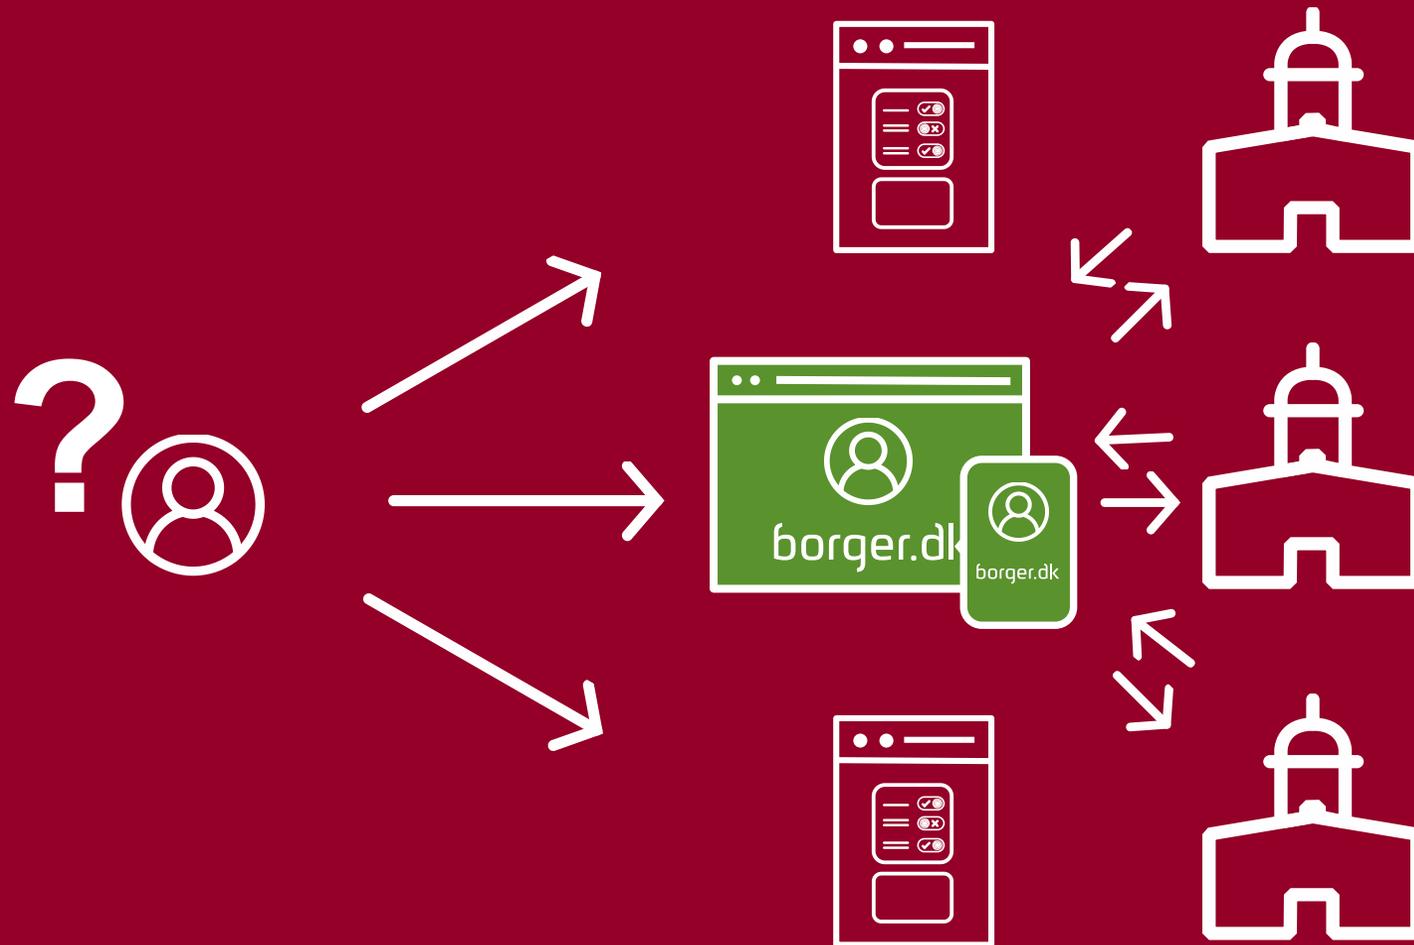

Important prerequisites

- High level of it-readiness among Danish citizens
- High level of cooperation across authorities
- The Digital Strategy 2016-2020
- Mandatory digital self-service and Digital Post
- Public standards and joint guidelines
- Common components (e.g. NemID, Digital Post)
- Borger.dk support 1881 and help and support in citizen service centers
- Self-service solutions, communication and administration anchored in the public institutions

The user experience

Safe, user-friendly and transparent public sector

Borger.dk in brief

- Borger.dk is a portal providing a single point of access to Danish public sector services for all Danish citizens
 - Borger.dk was launched in 2007 as a joint government initiative funded by all levels of government.
 - Borger.dk is a key player in eGovernment Strategies.
 - Today, borger.dk holds information and data from (almost) all state governmental institutions and integrates to about 2.000 self-service solutions.
- Borger.dk is a digital “central railway station” that guides and helps citizens solve their errands with the public sector digitally – especially when, as a citizen, you do not know where to start
 - Borger.dk helps to create a safe, user-friendly and manageable public sector.
 - Borger.dk specifically supports the cross-cutting overview and digital user journey that cross multiple solutions and authorities.

What are the objectives and benefits?

1

We make it easier to find information and services

39 million visits per year

High rating on Google etc.

Focus on communication, ease to use, simplicity and coherent user journeys

2

We make it easier to develop services across authorities

User journeys across authorities

Display of mandatory self-service solutions

Distribution of content and data

3

We make it easier to target and personalize

Proactive and responsive personalization

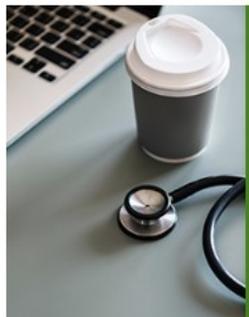

New services e.g. My benefits

New user journeys and 'life situations' e.g. Moving

Ansøg om/forny dansk pas

Her kan du som dansk statsborger ansøge om at få udstedt eller fornyet dit pas.

Videre

København

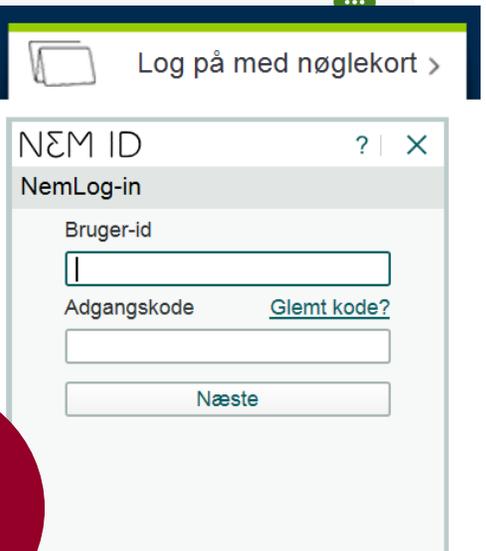

Sådan gør du

- Ved fælles forældremyndighed skal begge forældre underskrive ansøgningen for pas til børn.
- Ansøger du om pas for dit barn, skal du kende barnets højde.
- Hvis kommunen tilbyder det i løsningen eller på deres hjemmeside, kan du med fordel lave en tidsbestilling til pas.
- Det tager 11 - 15 hverdage, før du får dit nye pas.

- Åbn en guide, der viser, hvordan du gør

My page and personalized information

Data integration to the public sector – and personalized information

The screenshot shows the 'borger.dk' user interface. At the top, there is a navigation bar with 'borger.dk' on the left and icons for 'Digital Post' (with a red '34' notification), 'Min Side', 'Log af' (Margrethe Harbo), and 'Søg'. Below this is a welcome message: 'Velkommen, Margrethe Harbo'. The main content area is divided into several sections:

- DIGITAL POST**: 'Du har 34 ulæste beskeder' with a 'Læs Digital Post' button.
- MIN SUNDHED**: 'Sundhedsjournalen, medicinkort, laboratoriesvar'.
- MIN BOLIG**: 'Seneste flytning, meld flytning'.
- MIN ØKONOMI**: 'Skattemappe, indkomst, ydelser mm.'.
- MINE SAGER**: 'Blanketter, ansøgninger, indberetninger mm.'.
- MIN PROFIL**: 'Personoplysninger, indstillinger mm.'.

On the right side, there is a 'Ydelser' section with a heading 'Hvilke typer af ydelser kan du se?'. It lists 'Begravelseshjælps tilskud' (Senest udbetalt: 7. nov 2018: 200,00 kr.) with an 'Aktiv' status. Below this is a 'Baggrund' section with details about a grant. Further down is a 'Seneste udbetalinger' section with a table:

PERIODE	UDBETALING

Below the table is a list of links: 'Se din sag' and 'Læs general information om alkoholbevillinger'. At the bottom, there is a 'Folkepension' section with a list of links: 'Før du går på folkepension', 'Når du får folkepension', 'Udskudt pension', 'Førtidspension', 'Tillæg til folke- og førtidspension', 'ATP Livslang Pension', 'Tjenestemandspension og Lønmodtagernes Dyrtidsfond', 'International pension', 'Dit liv ændrer sig - tjek pensionen', 'Pensionssystemet i Danmark', and 'Efterløn, fleksydelse, delpension'. There are also sections for 'Skattenedslag for seniorer' and 'Næste udbetaling' (Den 30. november 2018).

Three red circular callouts are overlaid on the image:

- 'Digital Post' is placed over the Digital Post notification.
- 'Personalized information and services' is placed over the 'Ydelser' and 'Folkepension' sections.
- 'Topics' is placed over the 'MIN SUNDHED' and 'MIN ØKONOMI' sections.

Live demonstration – Log on to My page

The screenshot shows the homepage of borger.dk. At the top, there is a navigation bar with the logo 'borger.dk' and four icons: Digital Post, Min Side (circled in red), Log på, and Søg. Below the navigation bar are three promotional banners: 'NemID nøgle-app', 'Mange EU-syggeskrivningskort udløber i 2019', and 'Feriepenge til gode?'. Underneath are sections for 'Genveje' (with links like Falske beskeder, Forskudsopgørelsen, etc.) and 'Alle emner' (with links like Familie og børn, Skole og uddannelse, etc.). A red dashed arrow points from the 'Min Side' icon to a login form.

What do users think of borger.dk?

User feedback: Is the text easy to read and comprehend?

"Very! Just what I needed to get an overview that gives me peace of mind."

"Easily accessible, clear and to the point language. If you do not understand the text, it can only be due to lack of will. Very nice."

"No it is so d... stupid. I can't even report sick because everything has to be so obscure "

A need for more coherent services

- The current design of public digital self-service solutions is very much the result of the traditional sectoral structures and organizational **borders**.
- This means that digital public services *as a whole* do not live up to the expectations from citizens of a **coherent** and up-to-date digital service – even though most public digital solutions function well *separately*.
- **Goal** – to create digital guides that give citizens an overview of all the tasks relevant for the specific situation they are in (the 10 most important life events for citizens by 2024).

56%

of citizens needed to contact other entities or authorities in connection with their situation.

77%

of those who have been in contact with several entities or authorities did not find that the authorities were good at creating coherency.

21%

of the citizens who have used several single online self-service solutions indicate that they are "highly satisfied".

From My page to My overview on borger.dk

WORK IN
PROGRESS

The citizen can...

- Get an **overview** of the information and data the authorities have and easily access relevant self services.
- Find targeted and **personalized information**. Based on data and rules – e.g. age, benefits and address.
- Access **Digital Post**, My appointments etc.
- Find and start user journeys' and **digital guides**
